Gives an overview of the history of war, the causes and consequences of war and terrorism, and information on efforts to avoid military violence. In a friendly, accessible style with interesting anecdotes and real-life stories, the authors distill the wisdom of a wide range of people from various economic and ethnic backgrounds into six key elements that will help parents raise self-confident, life-loving, happy children. From two of the world's top scientists and one of the world's top science writers (all parents), *Dirt Is Good* is a q&a-based guide to everything you need to know about kids & germs. "Is it OK for my child to eat dirt?" That's just one of the many questions authors Jack Gilbert and Rob Knight are bombarded with every week from parents all over the world. They've heard everything from "My two-year-old gets constant ear infections. Should I give her antibiotics? Or probiotics?" to "I heard that my son's asthma was caused by a lack of microbial exposure. Is this true, and if so what can I do about it now?" Google these questions, and you'll be overwhelmed with answers. The internet is rife with speculation and misinformation about the risks and benefits of what most parents think of as simply germs, but which scientists now call the microbiome: the combined activity of all the tiny organisms inside our bodies and the surrounding environment that have an enormous impact on our health and well-being. Who better to turn to for answers than Drs. Gilbert and Knight, two of the top scientists

leading the investigation into the microbiome—an investigation that is producing fascinating discoveries and bringing answers to parents who want to do the best for their young children. *Dirt Is Good* is a comprehensive, authoritative, accessible guide you've been searching for. Being a good parent is more complicated than ever. Kids are exposed to a jungle of dangers: premature sex, underage drinking, drug use, etc. Yet, parents are so busy that many despair of their ability to transform their children into high-functioning adults. In *Quick Guide to Good Kids*, Virginia Bentz shows how parents can be a strong line of defense for their children. By managing the environment of your offspring when you are with them, you'll help ensure that they make the right decisions when you aren't. Bentz's strategies are simple: . Spend lots of time with babies; it's the age at which they're most receptive.. Don't criticize. Children come to believe what you tell them.. The teacher's word is law-don't argue with her.. Don't quit. You must teach by example how work gets done.. Know where your teenagers are. Period.The bottom line? Parents have lots of time to help their children grow into successful and happy adults-they simply have to know how to use it. It was the summer Coltrane died, the summer of love and riots, and the summer when a chance encounter in Brooklyn led two young people on a path of art, devotion, and initiation. Patti Smith would evolve as

a poet and performer, and Robert Mapplethorpe would direct his highly provocative style toward photography. Bound in innocence and enthusiasm, they traversed the city from Coney Island to Forty-second Street, and eventually to the celebrated round table of Max's Kansas City, where the Andy Warhol contingent held court. In 1969, the pair set up camp at the Hotel Chelsea and soon entered a community of the famous and infamous—the influential artists of the day and the colorful fringe. It was a time of heightened awareness, when the worlds of poetry, rock and roll, art, and sexual politics were colliding and exploding. In this milieu, two kids made a pact to take care of each other. Scrappy, romantic, committed to create, and fueled by their mutual dreams and drives, they would prod and provide for one another during the hungry years. *Just Kids* begins as a love story and ends as an elegy. It serves as a salute to New York City during the late sixties and seventies and to its rich and poor, its hustlers and hellions. A true fable, it is a portrait of two young artists' ascent, a prelude to fame. I don't know how she does it! is an oft-heard refrain about mothers today. Funnily enough, most moms agree they have no idea how they get it done, or whether they even want the job. Trisha Ashworth and Amy Nobile spoke to mothers of every stripe--working, stay-at-home, part-time--and found a surprisingly similar trend in their interviews. After enthusing about her lucky life for twenty minutes, a mother would then break down and admit that her child's

first word was "Shrek." As one mom put it, "Am I happy? The word that describes me best is challenged." Fresh from the front lines of modern motherhood comes a book that uncovers the guilty secrets of moms today . . . in their own words. *I Was a Really Good Mom Before I Had Kids* diagnoses the craziness and offers real solutions, so that mothers can step out of the madness and learn to love motherhood as much as they love their kids. Discovering that their parents are having an affair with each other, fifteen-year-old friends Josh and Khadijah make a pact that they will never cheat on anyone, an agreement that is tested years later when they reconnect after becoming engaged to different people. This sweet board book celebrates different types of children that have one important thing in common: they're all good kids—and every kid is one of a kind. Tall kids, short kids, Build a pillow fort kids. Shy kids, glad kids, Love to belly laugh kids. No two kids are alike and this charming story celebrates those special differences that make kids both unique and similar. Judy Carey Nevin's bouncing text paired with Susie Hammer's brilliant and bright art proves that while children may appear to be different, they also enjoy many of the same things. It's these shared differences and similarities that make every kid one of a kind. This is not the recipe book your mother had when she was a child. Recipes that encourage healthy eating and stunning photography by a top food photographer make this a truly modern

children's cookbook. To help kids understand the origins of food at an early age, the recipes and advice are divided up into sections based on production: From the Sea, From the Garden, From Afar, and so on. Each of the 50 recipes teaches an important culinary or technique, so whisking up meringues, mixing the batter for pancakes, and dry-frying curry spices become delightfully informative experiences. All the classic skills are here, too—from blending and grating to making sauces and rolling pastry—plus kitchen safety and hygiene tips. For 21st century mothers, there seem to be just two choices: be a Super Mom or be a Slacker Mom. One's bad for you; one's bad for your kids. So what's a momma to do? "Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and

convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging and important.” --Washington Post "What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play." --NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the "wrong" program, their child won't get into the "right" college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children's

future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn how to get out of their way. Christakis's message is energizing and reassuring: young children are inherently powerful, and they (and their parents) will flourish when we learn new ways of restoring the vital early learning environment to one that is best suited to the littlest learners. This bold and pragmatic challenge to the conventional wisdom peels back the mystery of childhood, revealing a place that's rich with possibility. This book is based on helping parents with ideas on how to spend more family time at mealtime with their children, while learning about healthier snack choices. Children seems to always feel the need for something to eat right before mealtime. Most parents are concern that eating before a major meal such as dinner will ruin

their appetite. There are also the children whom parents can not get them to eat their meals. This book gives some positive suggestions to help relieve their worries. Mealttime is a great time and can be fun time. Get Your Child Hooked on Books! Reading can become a favorite part of any child's life—even children who think they hate to read. Why does my child seem to worry so much? Being the parent of a smart child is great—until your son or daughter starts asking whether global warming is real, if you are going to die, and what will happen if they don't get into college. Kids who are advanced intellectually often let their imaginations ruin wild and experience fears beyond their years. So what can you do to help? Edwards focuses on how to parent a child who is both smart and anxious and brings her years of experience as a therapist to give you the answers to questions such as: •How do smart kids think differently? •Should I let my child watch the nightly news on TV? •How do I answer questions about terrorists, hurricanes, and other scary subjects?
