*• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming “There’s been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of*

practical wisdom.” —David Roberts, Vox “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA

*In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth’s warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world. The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today. While attempting to clear her husband of a murder charge, artist Ann Marcel enters the shadowy world of New Orleans’s erotic clubs and after-hours jazz joints, where she meets a ruggedly seductive man who tells her lies and secrets.*

She's determined to keep her scholarship, and that means no distractions...until she takes a summer internship at Stone Cliff Resort and meets bad boy Noah Ryan. She knows she should keep her distance—after all he's not the kind of guy she can bring home to daddy—but his disarming smile and dangerous ways are entirely too tempting. College dropout, Noah Ryan takes one look at Kathryn and instantly knows her type—ambitious, driven and determined, just like he used to be, before the accident that derailed his life and left him an emotional wreck. He vows to avoid her, but when a co-worker backs him into a bet he can't refuse, everything he's been running from is challenged and he's forced to confront his demons. Soon, Kathryn and Noah are lost to everything except each other. As their lives become entwined, their passion is reckless, their heat all-consuming but when hurtful truths spill out, can Noah prove himself worthy of the one girl who can heal his wounded heart, or will the fire they ignited turn to ash when it all comes crashing down?* A death penalty lawyer and New Orleans resident chronicles the 2005 Katrina disaster and the year that followed, bringing to light the triumphs and tragedies that could be found within the city limits of this proud American city. Not nearly as provocative as the title would have you believe, *Three Guys Naked from the Waist Down* is the story of three guys attempting to make something of themselves in the world of comedy. Overly melodramatic at times, the Michael Rupert and Jerry Colker musical is entertaining and boasts a performance by Scott Bakula of *Quantum Leap* fame. When teenagers scuffle during a basketball game, they are typically benched. But when Will got into it on the court, he and his rival were sprayed in the face at close range by a chemical similar to Mace, denied a shower for twenty-four hours, and then locked in solitary confinement for a month. One in three American children will be arrested by the time they are twenty-three, and many will spend time locked inside horrific detention centers that defy everything we know about how to rehabilitate young offenders. In a clear-eyed indictment of the juvenile justice system run amok, award-winning journalist Nell Bernstein shows that there is no right way to lock up a child. The very act of isolation denies delinquent children the thing that is most essential to their growth and rehabilitation: positive relationships with caring adults. Bernstein introduces us to youth across the nation who have suffered violence and psychological torture at the hands of the state. She presents these youths all as fully realized people, not victims. As they describe in their own voices their fight to maintain their humanity and protect their individuality in environments that would deny both, these young people offer a hopeful alternative to the doomed effort to reform a system that should only be dismantled. *Burning Down the House* is a clarion call to shut down our nation's brutal and counterproductive juvenile prisons and bring our children home. In late June of 2009, doctors gave Kristine a one percent chance to live. In the space of a year, her entire life had been turned upside-down. She journeyed deep within her psyche for the battle of her life. In this brilliantly evocative ethnography,

*Francio Guadeloupe probes the ethos and attitude created by radio disc jockeys on the binational Caribbean island of Saint Martin/Sint Maarten. Examining the intersection of Christianity, calypso, and capitalism, Guadeloupe shows how a multiethnic and multireligious island nation, where livelihoods depend on tourism, has managed to encourage all social classes to transcend their ethnic and religious differences. In his pathbreaking analysis, Guadeloupe credits the island DJs, whose formulations of Christian faith, musical creativity, and capitalist survival express ordinary people's hopes and fears and promote tolerance. Today's environmental concerns have led to a new generation of high-tech stoves, designed to burn cleaner and more efficiently than ever before. The New Woodburner's Handbook is the essential layman's guide to both the latest improvements and the age-old wisdom of heating with wood. Chimney sweep Stephen Bushway presents first-time and long-time woodburners with all the information necessary to heat a home economically and safely, while safeguarding the environment for ourselves and our children. Topics discussed include: selecting the right home for your home and your lifestyle; tips for insulating and conserving energy at home; installing a woodstove safely, catalytic, noncatalytic, and pellet stoves -- pros and cons; masonry heaters -- an ancient and unsurpassed way of warming. New federal regulations and air-quality laws make it more important than ever that woodburners know about all of the options available to them. The New Woodburner's Handbook helps you apply the latest developments in the industry to your specific situation and decide for yourself how heating with wood makes sense in your own home. This book presents a new technology, first developed in Japan by Sato, for improving existing products and creating new and better products. It combines traditional tear-down with the technologies of value analysis and value engineering. In the years since Hurricane Katrina, the modern-day bohemians of New Orleans have found themselves forced to the edges of poverty by the new tourist economy. Modeling his work after George Orwell's Down and Out in Paris and London, the sociologist and ethnographer Peter J. Marina explores this unfamiliar side of the gentrifying "new" New Orleans. In 1920s Paris, Orwell witnessed an influx of locals and outsiders seeking authenticity while struggling to live with bourgeois society. Marina finds a similar ambivalence in New Orleans: a tourism-dependent city whose commerce caters largely to well-heeled natives and upper-class travelers, where many creative locals and wanderers have remained outsiders, willingly or otherwise. Marina does not merely interview these spirited urban misfits—he lives among them. Down and Out in New Orleans follows their journeys, depicting the lives of those on the social fringes of a resilient city. Marina finds work as a bartender, street mime, and poet. Along the way, he visits homeless shelters, squats in abandoned buildings, attends rituals in cemeteries, and befriends writers, musicians, occultists, and artists as they look for creative solutions to the contradictory demands of late capitalism. Marina does for New Orleans what Orwell did for Paris a century earlier, providing a rigorous, unrelenting, and original glimpse into the subcultures of a city in rapid change. It was his survival of a near fatal head-on collision in 1940 that turned Elkan Kemp's life around. After crossing the threshold of death twice while hospitalized, he gained a new perspective on life and on death, as well. During his six years in the Air Corps, he met his dream-girl while at Pearl Harbor, and they were married. Elkan Kemp began his college education in 1946 at the University of Iowa. There he obtained both a BA and an MA degree, with majors in Sociology and Religion. It was during this time that his interests included in-depth studies of the Old Testament under Rabbi Judah Goldin. He studied religion under Dr. Marcus Bach and Theology under several Jesuit priests. He learned five dialects in Greek and received honors in Phi Eta Sigma, Eta Sigma Phi and Phi Beta Kappa. Reverend Kemp's religious studies at the University of Iowa led him to three years of graduate work at the San Francisco Theological Seminary which included research in Greek and advanced Hebrew. He also went on to earn a divinity degree and a Seminary Fellowship for*

study at the University of Edinburgh, Scotland. His experience at the University of Edinburgh led him to more advanced work in Hebrew and extensive studies of the Muslim religion. With a Ph.D. thesis entitled, *Life, Death and What Comes After*, Elkan Kemps education now led him to his lifelong devotion to pastoral work. After teaching from the Bible for more than 60 years, Reverend Kemp became aware of just how many thinking people have been frustrated by the walls of religious myth, legend, creed and dogma that the churches and synagogues have erected. His decision to write this book came out of a desire to ease those frustrations by helping people to break down those walls. There was a practical side to his effort. He sat with many deeply religious laymen and ministers who came to that event we call death, with great anxiety. Reverend Kemp believes that it is evident that the Judaeo-Christian religion is not working, for those walls require a hand-me-down religion and this does not work. Reverend Kemp states, We truly believe only what we know about our God first hand. I hope, with this book, people will be able to find that experience and to have a full life, and then come to death with a firm, happy confidence . . . not just a vague hope. Presents illustrations of neighborhoods and famous landmarks of New York City as they appeared in the 1920s. The story of Jayson Blair and the chaos he sowed at the New York Times is a cautionary tale for the American media and for a public concerned about the accuracy of the news it consumes. A young African American reporter said to be "promising and talented" was found to have plagiarized a former fellow NYT intern on a story about Iraq War casualties. This led to revelations involving a long pattern of egregious plagiarism, outright fabrication, dateline fraud and other forms of journalistic deception - rocking the Times to its foundations. After nearly a month in the hot seat, the paper's two top editors resigned, under pressure from publisher Arthur Sulzberger Jr. and despite promises that no such "newsroom scapegoating" would occur. The Times management called the Blair scandal an anomaly that shouldn't stain the paper's reputation or raise questions about racial favoritism. But as William McGowan shows in this hard-hitting inquiry, the episode was symptomatic of a long institutional and intellectual downward slide that has set America's most important news icon at odds with its journalistic mission - and with much of mainstream America. Using the Blair Affair as a springboard, McGowan examines the past decade at the Times, focusing on figures such as Sulzberger, fired editor Howell Raines and Jayson Blair himself to understand how an "irreplaceable national institution" could turn into the butt of late-night Letterman and Leno jokes. How did the Times become so suffused with intellectual orthodoxy and so committed to a tattered political correctness? Who is responsible for squandering the finest legacy in American journalism? Can the Times recover? These are some of the questions McGowan ponders in *Gray Lady Down*, the inside story of what happened to America's "Paper of Record. The present ecological mutation has organized the whole political landscape for the last thirty years. More than one hundred and twenty-five images and more than eighty texts—including flyers, zines, newsprint weeklies, book covers, and more—capture the spontaneity of New York's downtown literary scene between 1974 and 1992, offering profiles of Spalding Gray, Lynne Tillman, Eric Bogosian, Kathy Acker, Miguel Piñero, and other writers. *Simultaneous*. The weekly source of African American political and entertainment news. In the tradition of *Silent Spring* and *The Sixth Extinction*, an urgent, meticulously researched, and groundbreaking book about the ways in which chemicals in the modern environment are changing—and endangering—human sexuality and fertility on the grandest scale, from renowned epidemiologist Shanna Swan. In 2017, author Shanna Swan and her team of researchers completed a major study. They found that over the past four decades, sperm levels among men in Western countries have dropped by more than 50 percent. They came to this conclusion after examining 185 studies involving close to 45,000 healthy men. The result sent shockwaves around the globe—but the story didn't end there. It turns out our sexual development is changing in broader ways, for both men and women and even other species, and that the modern world is on pace to become an infertile one. How and why could this happen? What is hijacking our fertility and our health? *Count Down* unpacks these questions, revealing what Swan and other researchers have learned about how both lifestyle and chemical exposures are affecting our fertility, sexual development—potentially including the increase in gender fluidity—and general health as a species. Engagingly explaining the science and repercussions of these worldwide threats and providing simple and practical guidelines for effectively avoiding chemical goods (from water bottles to shaving cream) both as individuals and societies, *Count Down* is at once an urgent wake-up call, an illuminating read, and a vital tool for the protection of our future. From the Pulitzer Prize-winning New York Times reporter who has defined Donald J. Trump's presidency like no other journalist: a magnificent and disturbing reckoning that chronicles his life and its impact, from his rise in New York City to his tortured postpresidency. All of Trump's behavior as president had echoes in what came before. In this revelatory and news-making book, Haberman brings together the events of his life into a single mesmerizing work. It is the definitive account of one of the most norms-shattering and consequential eras in American political history. Preface: a book about advice, not an advice book -- Introduction: the company you keep -- You are just like Coca-Cola: selling your self through personal branding -- Being generic--and not--in the right way --

*Getting off the screen and into networks -- Didn't we meet on LinkedIn? -- Changing the technological infrastructure of hiring -- The decision makers: what it means to be a hiring manager, recruiter, or HR person -- When moving on is the new normal -- Conclusion: we wanted a labor force but human beings came instead Finding a job used to be simple. You'd show up at an office and ask for an application. A friend would mention a job in their department. Or you'd see an ad in a newspaper and send in your cover letter. Maybe you'd call the company a week later to check in, but the basic approach was easy. And once you got a job, you would stay—often for decades. Now . . . well, it's complicated. If you want to have a shot at a good job, you need to have a robust profile on LinkedIn. And an enticing personal brand. Or something like that—contemporary how-to books tend to offer contradictory advice. But they agree on one thing: in today's economy, you can't just be an employee looking to get hired—you have to market yourself as a business, one that can help another business achieve its goals. That's a radical transformation in how we think about work and employment, says Ilana Gershon. And with *Down and Out in the New Economy*, she digs deep into that change and what it means, not just for job seekers, but for businesses and our very culture. In telling her story, Gershon covers all parts of the employment spectrum: she interviews hiring managers about how they assess candidates; attends personal branding seminars; talks with managers at companies around the United States to suss out regional differences—like how Silicon Valley firms look askance at the lengthier employment tenures of applicants from the Midwest. And she finds that not everything has changed: though the technological trappings may be glitzier, in a lot of cases, who you know remains more important than what you know. Throughout, Gershon keeps her eye on bigger questions, interested not in what lessons job-seekers can take—though there are plenty of those here—but on what it means to consider yourself a business. What does that blurring of personal and vocational lives do to our sense of our selves, the economy, our communities? Though it's often dressed up in the language of liberation, is this approach actually disempowering workers at the expense of corporations? Rich in the voices of people deeply involved with all parts of the employment process, *Down and Out in the New Economy* offers a snapshot of the quest for work today—and a pointed analysis of its larger meaning. *Rage* is an unprecedented and intimate tour de force of new reporting on the Trump presidency facing a global pandemic, economic disaster and racial unrest. Woodward, the #1 international bestselling author of *Fear: Trump in the White House*, has uncovered the precise moment the president was warned that the Covid-19 epidemic would be the biggest national security threat to his presidency. In dramatic detail, Woodward takes readers into the Oval Office as Trump's head pops up when he is told in January 2020 that the pandemic could reach the scale of the 1918 Spanish Flu that killed 675,000 Americans. In 17 on-the-record interviews with Woodward over seven volatile months—an utterly vivid window into Trump's mind—the president provides a self-portrait that is part denial and part combative interchange mixed with surprising moments of doubt as he glimpses the perils in the presidency and what he calls the “dynamite behind every door.” At key decision points, *Rage* shows how Trump's responses to the*

*crises of 2020 were rooted in the instincts, habits and style he developed during his first three years as president. Revisiting the earliest days of the Trump presidency, Rage reveals how Secretary of Defense James Mattis, Secretary of State Rex Tillerson and Director of National Intelligence Dan Coats struggled to keep the country safe as the president dismantled any semblance of collegial national security decision making. Rage draws from hundreds of hours of interviews with firsthand witnesses as well as participants' notes, emails, diaries, calendars and confidential documents. Woodward obtained 25 never-seen personal letters exchanged between Trump and North Korean leader Kim Jong Un, who describes the bond between the two leaders as out of a "fantasy film." Trump insists to Woodward he will triumph over Covid-19 and the economic calamity. "Don't worry about it, Bob. Okay?" Trump told the author in July. "Don't worry about it. We'll get to do another book. You'll find I was right." The contemporary music magazine. In the clubs, ballrooms, and barbecue joints of neighborhoods such as Third Ward, Frenchtown, Sunnyside, and Double Bayou, Houston's African American community birthed a vibrant and unique slice of the blues. Ranging from the down-home sounds of Lightnin' Hopkins to the more refined orchestrations of the Duke-Peacock recording empire and beyond, Houston blues was and is the voice of a working-class community, an ongoing conversation about good times and hard times, smokin' Saturday nights and Blue Mondays. Since 1995, Roger Wood and James Fraher have been gathering the story of the blues in Houston. In this book, they draw on dozens of interviews with blues musicians, club owners, audience members, and music producers, as well as dramatic black-and-white photographs of performers and venues, to present a lovingly detailed portrait of the Houston blues scene, past and present. Going back to the early days with Lightnin' Hopkins, they follow the blues from the streets of Houston's Third and Fifth Wards to its impact on the wider American blues scene. Along the way, they remember the vigorous blues community that sprang up after World War II, mourn its decline in the Civil Rights era, and celebrate the lively, if sometimes overlooked, blues culture that still calls Houston home. Wood and Fraher conclude the book with an unforgettable reunion of Houston blues legends that they held on January 3, 1998.*
