The Struggle For Nature Jan 28 2020 The Struggle for Nature outlines and examines the main aspects of current environmental philosophy including deep ecology, social and political ecology, eco-feminism and eco-anarchism. It criticises the dependency on science of these philosophies and the social problems engendered by them. The author argues for a post-naturalistic turn in environmental philosophy. The Struggle for Nature presents the most up-to-date arguments in environmental philosophy, which will be valuable reading for students of applied philosophy, environmental studies and geography.

Chest Sonography Oct 07 2020 This book, widely regarded as the standard work in the field, presents the state of the art in chest sonography, enhanced by a wealth of excellent illustrations. It provides the reader with concise, easy-to-assimilate information on all aspects of the use of the modality, including indications, investigative techniques, diagnostic decision making, and imaging artifacts and pitfalls. Chapters offer numerous tips and tricks and highlight potential diagnostic error sources to aid in daily clinical practice. This sixth edition has been extensively revised to consider the latest techniques, study results, and meta-analyses and includes essential additional illustrative material. Chapter revisions include detailed guidance on contrast-enhanced ultrasound (CEUS) and the use of thoracic point-of-care ultrasound (PoCUS) in emergency patients. As the technique's value and use continue to grow, readers will find Chest Sonography a valuable up-to-date resource and guide.

The EBCOG Postgraduate Textbook of Obstetrics & Gynaecology Apr 24 2022 An essential, up-to-date textbook for postgraduate trainees preparing for the EBCOG Fellowship exam.

Zivilgesellschaftliches Engagement durch Community Radios Jul 16 2021 Der Partizipation wird weitgehend undifferenziert ein demokratieförderndes Potenzial zugeschrieben. Esther Dorn-Fellermann geht in ihrer qualitativen Studie dieser Annahme in

einem Umfeld nach, das sich noch in der zivilgesellschaftlichen Konsolidierung befindet: Sie analysiert fünf Community Radios in Südafrika und führt Interviews und Gruppendiskussionen mit Akteuren durch. Zunächst wird der Begriff Zivilgesellschaft vor allem mit Blick auf die notwendigen Voraussetzungen für ein zivilgesellschaftliches Engagement in demokratieorientierten partizipativen Medien diskutiert. Die folgende Beschreibung der Entwicklung des Radios als partizipatives Medium führt zu einem Idealtypus von Community Radio, der im Sinne von Max Weber dazu dienen soll, die Diskrepanz zwischen Ideal und Wirklichkeit aufzuzeigen. Die Nähe dieses Ideals zu den Voraussetzungen für ein zivilgesellschaftliches Engagement, ermöglicht eine Zusammenführung der beiden Konzepte. So kann die partizipative Medienarbeit in Community Radios unter bestimmten Voraussetzungen als demokratieförderndes, zivilgesellschaftliches Engagement bezeichnet werden. Die Arbeit fokussiert die Mitarbeiter der Community Radios. Sie befasst sich mit dem Erleben der normativen Ansprüche an zivilgesellschaftliches Engagement und deren Einordnung durch die Akteure in ihrem Sendealltag.

What Happened to You? Nov 07 2020 #1 NEW YORK TIMES BESTSELLER Our earliest experiences shape our lives far down the road, and *What Happened to You?* provides powerful scientific and emotional insights into the behavioral patterns so many of us struggle to understand. "Through this lens we can build a renewed sense of personal self-worth and ultimately recalibrate our responses to circumstances, situations, and relationships. It is, in other words, the key to reshaping our very lives."—Oprah Winfrey This book is going to change the way you see your life. Have you ever wondered "Why did I do that?" or "Why can't I just control my behavior?" Others may judge our reactions and think, "What's wrong with that person?" When questioning our emotions, it's easy to place the blame on ourselves; holding ourselves and those around us to an impossible standard. It's time we started asking a different question. Through deeply personal conversations, Oprah Winfrey and renowned brain and trauma expert Dr. Bruce Perry offer a groundbreaking and profound shift from asking "What's wrong with you?" to "What happened to you?" Here, Winfrey shares stories from her own past, understanding through experience the vulnerability that comes from facing trauma and adversity at a young age. In conversation throughout the book, she and Dr. Perry focus on understanding people, behavior, and ourselves. It's a subtle but profound shift in our approach to trauma, and it's one that allows us to understand our pasts in order to clear a path to our future—opening the door to resilience and healing in a proven, powerful way.

Python Crash Course, 2nd Edition Aug 29 2022 The second edition of the best-selling Python book in the world (over 1 million copies sold!). A fast-paced, no-nonsense guide to programming in Python. Updated and thoroughly revised to reflect the latest in Python code and practices. *Python Crash Course* is the world's best-selling guide to the Python programming language. This fast-paced, thorough introduction to programming with Python will have you writing programs, solving problems, and making things that work in no time. In the first half of the book, you'll learn basic programming concepts, such as variables, lists, classes, and loops, and practice writing clean code with exercises for each topic. You'll also learn how to make your programs interactive and test your code safely before adding it to a project. In the second half, you'll put your new knowledge into practice with three substantial projects: a Space Invaders-inspired arcade game, a set of data visualizations with Python's handy libraries, and a simple web app you can deploy online. As you work

through the book, you'll learn how to:

- Use powerful Python libraries and tools, including Pygame, Matplotlib, Plotly, and Django
- Make 2D games that respond to keypresses and mouse clicks, and that increase in difficulty
- Use data to generate interactive visualizations
- Create and customize web apps and deploy them safely online
- Deal with mistakes and errors so you can solve your own programming problems

If you've been thinking about digging into programming, Python Crash Course will get you writing real programs fast. Why wait any longer? Start your engines and code!

Genealogy and Social History Oct 31 2022 In recent years, genealogical websites and government agencies have made millions of valuable historical documents digitally available to the public. There is a tremendous amount of information that can be gleaned from these documents to aid scholars interested in social history. This volume brings together researchers presenting historically contextualized family case studies as a lens to enrich the reader's understanding of the past.

Copyright Exhaustion Jun 02 2020 In the Second Edition of *Copyright Exhaustion*, copyright scholar Péter Mezei offers an expanded examination of copyright exhaustion, including its historical development, theoretical framework, practical applications, and policy considerations. He includes updated case law and statutory developments for the first-sale doctrine in the United States and in the European Union, covering both analogue and digital applications with an eye toward scrutinizing the common rejection of exhaustion in the resale of digital subject matter including computer programs, sound recordings, audiovisual works, and e-books. He advocates for a digital first-sale doctrine that would offer legal consistency to copyright law and a technologically feasible framework for content producers and consumers.

Aesthetics of Interaction in Digital Art Sep 25 2019 An art-historical perspective on interactive media art that provides theoretical and methodological tools for understanding and analyzing digital art. Since the 1960s, artworks that involve the participation of the spectator have received extensive scholarly attention. Yet interactive artworks using digital media still present a challenge for academic art history. In this book, Katja Kwastek argues that the particular aesthetic experience enabled by these new media works can open up new perspectives for our understanding of art and media alike. Kwastek, herself an art historian, offers a set of theoretical and methodological tools that are suitable for understanding and analyzing not only new media art but also other contemporary art forms. Addressing both the theoretician and the practitioner, Kwastek provides an introduction to the history and the terminology of interactive art, a theory of the aesthetics of interaction, and exemplary case studies of interactive media art. Kwastek lays the historical and theoretical groundwork and then develops an aesthetics of interaction, discussing such aspects as real space and data space, temporal structures, instrumental and phenomenal perspectives, and the relationship between materiality and interpretability. Finally, she applies her theory to specific works of interactive media art, including narratives in virtual and real space, interactive installations, and performance—with case studies of works by Olia Lialina, Susanne Berkenheger, Stefan Schemat, Teri Rueb, Lynn Hershman, Agnes Hegedüs, Tmema, David Rokeby, Sonia Cillari, and Blast Theory.

„Das Ende der politischen Ordnungsvorstellungen des 20. Jahrhunderts.“ Feb 29 2020 Der Band fasst erziehungswissenschaftliche Erkenntnisse und Positionierungen zur aktuellen historischen Phase, die mit guten Gründen als der endgültige Bruch mit soziopolitischen,

-kulturellen und -moralischen Ordnungsvorstellungen des 20. Jahrhunderts bezeichnet wird, zusammen.

Urban Commons Oct 19 2021 This book rethinks the city by examining its various forms of collectivity – their atmospheres, modes of exclusion and self-organization, as well as how they are governed – on the basis of a critical discussion of the notion of urban commons. The idea of the commons has received surprisingly little attention in urban theory, although the city may well be conceived as a shared resource. *Urban Commons: Rethinking the City* offers an attempt to reconsider what a city might be by studying how the notion of the commons opens up new understandings of urban collectivities, addressing a range of questions about urban diversity, urban governance, urban belonging, urban sexuality, urban subcultures, and urban poverty; but also by discussing in more methodological terms how one might study the urban commons. In these respects, the rethinking of the city undertaken in this book has a critical dimension, as the notion of the commons delivers new insights about how collective urban life is formed and governed.

The Nazi Holocaust. Part 3: The "Final Solution". Volume 2 Dec 09 2020 This edition is the first of its kind to offer a basic collection of facsimile, English language, historical articles on all aspects of the extermination of the European Jews. A total of 300 articles from 84 journals and collections allows the reader to gain an overview of this field. The edition both provides access to the immense, rich array of scholarly articles published after 1960 on the history of the Holocaust and encourages critical assessment of conflicting interpretations of these horrifying events. The series traces Nazi persecution of Jews before the implementation of the "Final Solution", demonstrates how the Germans coordinated anti-Jewish activities in conquered territories, and sheds light on the victims in concentration camps, ending with the liberation of the concentration camp victims and articles on the trials of war criminals. The publications covered originate from the years 1950 to 1987. Included are authors such as Jakob Katz, Saul Friedländer, Eberhard Jäckel, Bruno Bettelheim and Herbert A. Strauss.

Kardiovaskuläre Notfall- und Akutmedizin Jul 04 2020 Was ist unmittelbar notfallmäßig zu beachten bei der größten Gruppe von Patienten, die sich täglich selbst oder durch den Rettungsdienst in der Notaufnahme oder in ambulanten Strukturen vorstellen? Dieses Buch fokussiert auf die Primärpräsentation und entwickelt daraus das diagnostische Vorgehen und die weiteren therapeutischen Maßnahmen. Dabei werden Kriterien für die Entscheidung zur Überwachung, ambulanter oder stationärer Weiterbehandlung, diagnostischer Sequenzen und zeitlicher Dringlichkeit einzelner Schritte des Versorgungsprozesses besonders berücksichtigt. Jedes Kapitel wird durch eine Fallvignette eingeleitet, die das jeweils adressierte Krankheitsbild in typischer Ausprägung repräsentiert und auch besondere Herausforderungen in Diagnostik und Therapie aufzeigt. Je nach Thema ergänzt ein diagnostisches Flowchart, eine pathophysiologische Konzeption oder einen notfallmäßigen Ablauf visuell. Take-Home-Botschaften und als Besonderheit eine Box unter dem Stichwort „What to learn next“ z.B. in Form von konkreten Trainings- und Weiterbildungsempfehlungen oder den Hinweis auf Simulationskurse oder bestimmte verfügbare Fortbildungsformate, schließen das Kapitel ab. Krankheitsbezogene Kapitel werden von Methodik (z.B. nicht-invasive Beatmung), Epidemiologie und Versorgungsforschung ergänzt. Im Bereich kardiovaskulärer Notfallmedizin gibt es z.T.

relevante Unterschiede insbesondere in der klinischen Präsentation zwischen Frauen und Männern. Evidenzbasierte Unterschiede werden in jedem Kapitel in einer besonderen Infobox „Frauen“ hervorgehoben.

Transition and Coherence in Intellectual Property Law Feb 08 2021 This volume is for students and scholars of intellectual property law, practitioners seeking creative arguments from across the field, and policymakers searching for solutions to changing social and technological issues. The book explores the tensions between two fundamentally competing demands made of IP law.

Focal Peripheral Neuropathies Aug 24 2019 Every neurosurgeon as well as many surgeons in other disciplines, including plastic and orthopedic surgeons, may unexpectedly be confronted with an entrapment syndrome or a nerve trauma. With a view to preventing costly transfers to expert clinics, this manual for practitioners offers optimized step-by-step figures illustrating how best to approach every relevant nerve lesion. Clear advice is also provided on differential diagnosis from inflammatory neuropathies, which will assist in avoiding false indications for surgery. This is a true manual for practitioners that offers excellent guidance for all surgeons while in the operating theater.

Coronary Blood Flow Mar 31 2020 by JULIEN IE HOFFMAN One of the earliest coronary physiologists was Scaramucci who, in 1695, postulated that during systole the contracting myocardium inhibited coronary blood flow. Since then, the many contributions that have been made to our knowledge of the coronary circulation can be arbitrarily divided into three phases based on advances in technical methods. The early phase of research into the coronary circulation, done with great difficulty with crude methods, may be regarded as ending in the 1940s, and it included major discoveries made by such well known investigators as Georg von Anrep, Ernest Starling, Carl Wiggers, and Louis Katz, who formulated much of our basic understanding of the field. After 1940, the field of coronary physiology entered a new phase when instruments for high fidelity registration of coronary flow and pressure became available. This era was dominated by Donald Gregg who combined careful attention to the function of these instruments (some of which he helped to develop) with an extraordinary ability to discern mechanisms from apparently minor changes in coronary flow and pressure patterns. His book 'The Coronary Circulation in Health and Disease' set a new standard in the field. After 1960, techniques for measuring regional myocardial blood flow became available, and enabled a large group of eminent investigators to make major advances in understanding the physiology and pathophysiology of myocardial blood flow.

Handbuch der Künstlichen Intelligenz Oct 26 2019 Das Handbuch gibt einen umfassenden Überblick über grundlegende und moderne Methoden und Anwendungen der Künstlichen Intelligenz. Die Themen reichen von Kognition, Neuronale Netze, über Maschinelles Lernen, Sprach- und Bildverarbeitung bis hin zu Robotik und Software-Agenten und Anwendungen in der Industrie 4.0. Herausgeber und Autoren sind Spezialisten auf den jeweiligen Teilgebieten. Ein Muss für jeden, der sich mit dem Thema KI befasst.

Self-Efficacy in Changing Societies Mar 24 2022 The volume addresses important issues of human adaptation and change.

Theologische Schlüsselbegriffe Aug 17 2021 Eine Einführung in theologische Kernthemen:
elementar - fachlich fundiert - didaktisch erschlossen. Verfasst von den führenden
evangelischen Religionspädagoginnen und Religionspädagogen des deutschen
Sprachraums. Theologische Schlüsselbegriffe bilden den Inhalt des ersten, komplett neu
erarbeiteten Bandes der bewährten Reihe "Theologie für Lehrerinnen und Lehrer". Die
Autorinnen und Autoren erschließen anhand von 40 ausgewählten Begriffen zentrale
Themenbereiche christlicher Theologie. Jeder Begriff wird in dreifacher Weise entfaltet: aus
subjektorientierter, fachwissenschaftlicher und didaktischer Perspektive. Hier finden
Studierende wie Lehrende praxisbezogene Anregungen für einen theologisch fundierten und
an Kindern sowie Jugendlichen orientierten Religionsunterricht. Die Artikel sind alphabetisch
angeordnet. Sie ermöglichen eine klare Übersicht sowie eine elementare und verständliche
Grundorientierung. Themen im Einzelnen sind u. a.: Abendmahl, Bibel, Evangelium, Gebet,
Identität/Person/Selbst, Jesus Christus, Kirche/Gemeinde, Mensch, Reich
Gottes/Gottesherrschaft, Tod/Sterben, Wunder, Zukunft/Zeit.

Labour in a Single Shot Dec 21 2021 The book both extends and reflects upon a large-scale,
international art project that has taken the form of an online database and numerous
exhibitions (including the Venice Biennale and other important venues). The essays explore
the social, political, and ethical ramifications of documenting global labour with a roving
camera that often operates in close proximity to its human subjects. The inclusion of Antje
Ehmann's journal entries, translated for the first time into English, will offer a real-time
account of the workshops that will complement the scholarly essays' accounts of the videos.

The Oxford Handbook of Pierre Bourdieu Aug 05 2020 Pierre Bourdieu was one of the most
influential social thinkers of the past half-century, known for both his theoretical and
methodological contributions and his wide-ranging empirical investigations into colonial
power in Algeria, the educational system in France, the forms of state power, and the history
of artistic and scientific fields-among many other topics. Despite the depth and breadth of
his influence, however, Bourdieu's legacy has yet to be assessed in a comprehensive
manner. The Oxford Handbook of Pierre Bourdieu fills this gap by offering a sweeping
overview of Bourdieu's impact on the social sciences and humanities. Thomas Medvetz and
Jeffrey J. Sallaz have gathered a diverse array of leading scholars who place Bourdieu's work
in the wider scope of intellectual history, trace the development of his thought, offer original
interpretations and critical engagement, and discuss the likely impact of his ideas on future
social research. The Handbook highlights Bourdieu's contributions to established areas of
research-including the study of markets, the law, cultural production, and politics-and
illustrates how his concepts have generated new fields and objects of study.

Thoracic Ultrasound and Integrated Imaging Jan 22 2022 This book focuses on thoracic
ultrasound, a versatile, diagnostically accurate, low-cost, noninvasive and non-ionizing

imaging technique. Thanks to portable devices, the method can be used to provide quick and accurate diagnoses in emergency settings, during transport, or at the patient's bedside in intensive care units. In addition, as a dynamic examination that allows "real-time" assessment, it can be used to optimize diagnoses, the use of respiratory support equipment, surgical interventions and physiopathological assessments, both in critical patients and those with chronic conditions. Lastly, since it avoids ionizing radiation, thoracic ultrasound offers a first-line diagnostic tool for thoracic disease assessment in connection with pregnancy, neonatology and pediatrics. Pursuing a practical approach, this book also addresses the technological components that are needed in order to adequately set up the equipment. This integrated approach provides non-radiologists with essential know-how on using thoracic ultrasound as an extension of their physical examinations. Specific chapters are dedicated to thoracic ultrasound applications in neonatology, pediatrics and emergency medicine, as well as guided procedures and diaphragm function studies. Thoracic ultrasound has been a central element in the editors' clinical and experimental work for several years, and the book also includes contributions by prominent international experts on specific applications. Given its content and scope, the book will be of interest to all medical practitioners seeking a practical approach to thoracic ultrasound.

Python Crash Course Jan 02 2023 Python Crash Course is a fast-paced, thorough introduction to Python that will have you writing programs, solving problems, and making things that work in no time. In the first half of the book, you'll learn about basic programming concepts, such as lists, dictionaries, classes, and loops, and practice writing clean and readable code with exercises for each topic. You'll also learn how to make your programs interactive and how to test your code safely before adding it to a project. In the second half of the book, you'll put your new knowledge into practice with three substantial projects: a Space Invaders-inspired arcade game, data visualizations with Python's super-handly libraries, and a simple web app you can deploy online. As you work through Python Crash Course you'll learn how to:

- Use powerful Python libraries and tools, including matplotlib, NumPy, and Pygal
- Make 2D games that respond to keypresses and mouse clicks, and that grow more difficult as the game progresses
- Work with data to generate interactive visualizations
- Create and customize Web apps and deploy them safely online
- Deal with mistakes and errors so you can solve your own programming problems

If you've been thinking seriously about digging into programming, Python Crash Course will get you up to speed and have you writing real programs fast. Why wait any longer? Start your engines and code! Uses Python 2 and 3

Corruption as an Empty Signifier Jan 10 2021 Corruption as an Empty Signifier critically explores the ways in which corruption in Africa has been equated with African politics and political order, and offers a novel approach to understanding corruption as a potentially emancipatory discourse of political transformation.

Histamine Intolerance Dec 29 2019 Histamine is an important mediator of allergic diseases, but knowledge of histamine as a cause of numerous non-allergic symptoms and signs is limited. This book offers wide-ranging coverage of histamine intolerance. There is extensive background discussion of the origin of histamine, its content in food and alcoholic beverages and intolerance to red wine. Diagnosis of histamine intolerance is explained and the various symptoms of histamine intolerance are clearly described. Subsequent chapters cover the relation of histamine to a wide variety of conditions, including drug intolerance, atopic dermatitis, seasickness and osteoporosis. This book will prove of value in clinical

practice by facilitating differential diagnosis, which is by no means straightforward given the multiplicity of symptoms of histamine intolerance and by assisting in the selection of therapeutic measures.

Atlas zur Geschichte des Eisenbahnnetzes in Hessen Sep 17 2021 Auf 39 Karten in verschiedenen Maßstäben versucht dieser Atlas, die inzwischen 180jährige Geschichte des Eisenbahnnetzes in Hessen zu dokumentieren. Die Karten werden ergänzt durch eine Fülle von Daten unter anderem zur Eröffnung, Elektrifizierung oder Stilllegung von Strecken sowie zur Eröffnung und Schließung von Stationen und zu deren Namensänderungen. Ein Nachschlagewerk nicht nur für Eisenbahnfreunde, sondern auch für Historiker, (Verkehrs-)Geographen, Heimatforscher und Reisende.

Subjective Time Nov 27 2019 Interdisciplinary perspectives on the feature of conscious life that scaffolds every act of cognition: subjective time. Our awareness of time and temporal properties is a constant feature of conscious life. Subjective temporality structures and guides every aspect of behavior and cognition, distinguishing memory, perception, and anticipation. This milestone volume brings together research on temporality from leading scholars in philosophy, psychology, and neuroscience, defining a new field of interdisciplinary research. The book's thirty chapters include selections from classic texts by William James and Edmund Husserl and new essays setting them in historical context; contemporary philosophical accounts of lived time; and current empirical studies of psychological time. These last chapters, the larger part of the book, cover such topics as the basic psychophysics of psychological time, its neural foundations, its interaction with the body, and its distortion in illness and altered states of consciousness. Contributors Melissa J. Allman, Holly Andersen, Valtteri Arstila, Yan Bao, Dean V. Buonomano, Niko A. Busch, Barry Dainton, Sylvie Droit-Volet, Christine M. Kursbuch Bioethik Dec 01 2022 Der Sammelband gibt einen Überblick über aktuelle bioethische Fragestellungen. Die Beiträge gehen aus einem interdisziplinären Seminar mit Studierenden der Biotechnologie und Philosophie hervor. Nach einer allgemeinen Einführung in die Bioethik werden Themen vom Lebensanfang über Gesundheit und Verbesserung menschlicher Fähigkeiten bis zum Lebensende diskutiert. Die Auseinandersetzung umfasst kontrovers diskutierte Themen wie Präimplantationsdiagnostik, moderne Lebensmittel und Sterbehilfe. The anthology provides an overview concerning current bioethical issues. The chapters result from an interdisciplinary seminar with students of biotechnology and philosophy. Following a general introduction into bioethics, the discussion includes topics from the beginning of life, health and human enhancement to the end of life. It comprises inter alia preimplantation diagnostics, modern food production and euthanasia.

Undoing Networks Sep 05 2020 Exploring and conceptualizing practices, technologies, and politics of disconnecting How do we think beyond the dominant images and imaginaries of connectivity? Undoing Networks enables a different connectivity: "digital detox" is a luxury for stressed urbanites wishing to lead a mindful life. Self-help books advocate "digital minimalism" to recover authentic experiences of the offline. Artists envision a world without the internet. Activists mobilize against the expansion of the 5G network. If connectivity brought us virtual communities, information superhighways, and participatory culture, disconnection comes with privacy tools, Faraday shields, and figures of the shy. This book explores nonusage and the "right to disconnect" from work and from the excessive demands of digital capitalism.

Transatlantic Radicalism May 14 2021 The Atlantic Ocean not only connected North and South America with Europe through trade but also provided the means for an exchange of knowledge and ideas, including political radicalism. Socialists and anarchists would use this "radical ocean" to escape state prosecution in their home countries and establish radical milieus abroad. However, this was often a rather unorganized development and therefore the connections that existed were quite diverse. The movement of individuals led to the establishment of organizational ties and the import and exchange of political publications between Europe and the Americas. The main aim of this book is to show how the transatlantic networks of political radicalism evolved with regard to socialist and anarchist milieus and in particular to look at the actors within the relevant processes--topics that have so far been neglected in the major histories of transnational political radicalism of the late nineteenth and early twentieth centuries. Individual case studies are examined within a wider context to show how networks were actually created, how they functioned and their impact on the broader history of the radical Atlantic

Complementary and Integrative Therapies for Mental Health and Aging Mar 12 2021 Complementary and Integrative Therapies for Mental Health and Aging provides an up-to-date overview of integrative medicine that clinicians, researchers, and caregivers will require in order to address the major mental and physical disorders of aging. The chapters herein will increase clinicians' familiarity with the most recent research findings, and

broaden their understanding of the use of these interventions in clinical practice. The discussion of the data is provided in easy-to-use format covering different fields of integrative medicine, and is written by an international group of leaders and researchers in their respective areas of expertise. This volume can be used for training by students of integrative medicine and gerontology, and individual chapters can be used as on-the-go references on a particular topic. Putting this work into a wider context, volume editors Helen Lavretsky, Martha Sajatovic, and Charles Reynolds III also provide a necessary framework for clinicians and public policy makers to understand the necessity of pursuing complementary, alternative, and integrative medicine for aging adults.

Principles of Exercise Testing and Interpretation May 26 2022 "In this fifth edition of *Principles of Exercise Testing and Interpretation*, as in earlier editions, we attempt to develop conceptual advances in the physiology and pathophysiology of exercise, particularly as related to the practice of medicine. The underlying theme of the book continues to be the recognition that the most important requirement for exercise performance is transport of oxygen to support the bioenergetic processes in the muscle cells (including, of course, the heart) and elimination of the carbon dioxide formed as a byproduct of exercise metabolism. Thus, appropriate cardiovascular and ventilatory responses are required to match those of muscle respiration in meeting the energy demands of exercise. As depicted by the logo on the book cover, normal exercise performance requires an efficient coupling of external to internal (cellular) respiration. Appropriate treatment of exercise intolerance requires that patients' symptoms be thought of in terms of a gas exchange defect between the cell and the environment. The defect may be in the lungs, heart, peripheral or pulmonary circulations, the muscles themselves, or there may be a combination of defects. Thus, we describe the pathophysiology in gas transport and exchange that affect any site in the cardio-respiratory coupling between the lungs and the muscles. We illustrate how cardiopulmonary exercise testing can provide the means for a critical evaluation by the clinician-scientist of the functional competency of each component in the coupling of cellular to external respiration, including the cardiovascular system. To achieve this, clinical cases are used to illustrate the wide spectrum of pathophysiology capable of causing exercise intolerance"--Provided by publisher.

Comrades of Color Jun 14 2021 In keeping with the tenets of socialist internationalism, the political culture of the German Democratic Republic strongly emphasized solidarity with the non-white world: children sent telegrams to Angela Davis in prison, workers made contributions from their wages to relief efforts in Vietnam and Angola, and the deaths of Patrice Lumumba, Ho Chi Minh, and Martin Luther King, Jr. inspired public memorials. Despite their prominence, however, scholars have rarely examined such displays in detail. Through a series of illuminating historical investigations, this volume deploys archival research, ethnography, and a variety of other interdisciplinary tools to explore the rhetoric and reality of East German internationalism.
