Educators have long known that many students rely on their sense of sight to take in information. When these children see information, rather than just hearing it, they are more likely to understand and remember what is being taught. These students are called visual learners. Many children fall into this category, especially those that are dyslexic or those that have an auditory processing disorder (APD). Visual learners often have a difficult time memorizing the multiplication facts. They understand the concept of multiplication, but are unable to easily remember the times tables. This book offers a different approach. Just the Facts teaches the multiplication facts in a visual manner in order to provide a framework for the child to remember the math fact. Division is also addressed along with many memory cues. Put the authority of Tintinalli's into your emergency medicine review! Finalist, 2016 National Indie Excellence Awards (Fiction - General) Finalist, 2016 International Book Awards (Fiction - General) Finalist, 2016 Next Generation Indie Book Awards (Two categories: General Fiction/Novel, under 80,000 words, and Second Novel) Finalist, 2015 USA Best Book Awards (Women's Fiction) When English major Nora Plowright finds herself staring at college graduation as if at the edge of a cliff, she decides to become a newspaper reporter—and right away, she manages to get a job at a local paper (which you could still do in 1978). Although fearful by nature, Nora pursues a tip from a stranger and soon is investigating corruption at the Maryland State Highway Authority regarding the controversial placement of a major highway. The developing scandal, with its shady “players,” tests both her budding reportorial skills and her appetite for danger. Also, her passion for storytelling makes it increasingly difficult for her to stick to the facts. Honest and humorous, *Just the Facts* is a coming-of-age novel about finding one's way in the real world that will resonate with anyone who has struggled with figuring out what to do when she or he grows up. Honest and humorous, *Just the Facts* is a coming-of-age novel about finding one's way in the real world that will resonate with anyone who has struggled with figuring out what to do when she or he grows up. Mastering the basic facts for addition, subtraction, multiplication, and division is an essential goal for all students. Most educators also agree that success at higher levels of math hinges on this fundamental skill. But what's the best way to get there? Are flash cards, drills, and timed tests the answer? If so, then why do students go into the upper elementary grades (and beyond) still counting on their fingers or experiencing math anxiety? What does research say about teaching basic math facts so they will stick? In *Math Fact Fluency*, experts Jennifer Bay-Williams and Gina Kling provide the answers to these questions—and so much more. This book offers everything a teacher needs to teach, assess, and communicate with parents about basic math fact instruction, including The five fundamentals of fact fluency, which provide a research-based framework for effective instruction in the basic facts. Strategies students can use to find facts that are not yet committed to memory. More than 40 easy-to-make, easy-to-use games that provide engaging fact practice. More than 20 assessment tools that provide useful data on fact fluency and mastery. Suggestions and strategies for collaborating with families to help their children master the basic math facts. *Math Fact Fluency* is an indispensable guide for any educator who needs to teach basic facts. This approach to facts instruction, grounded in years of research, will transform students' learning of basic facts and help them become more confident, adept, and successful at math. Bill Tilghman, legendary Western lawman at the turn of the century. Mary Cecilia Rogers, the real-life ?Marie Roget? whose story inspired Edgar Allan Poe. FBI Special Agent Ed Mireles, who?literally single-handedly?took down two murderous bank robbers in South Miami. Their stories and many more are brought to life by Jim Doherty, ?Just the Facts? columnist for *Mystery Readers Journal*. ?Jim Doherty combines the cool eye of a law enforcement professional (which he is) with the fiery enthusiasm of a fan (which he also is) in a superb collection of essays detailing the true-crime back-stories of some mystery fiction?s greatest yarns. These crisp, no-nonsense accounts are hypnotically readable, and the Eliot Ness chapter alone is worth the price of admission. ? ?Max Allan Collins, author of *Road To Perdition* Presents advice to help young readers compose their own research paper, including thirteen points on choosing a topic, doing research, writing an outline, taking notes, doing a rough draft, and editing the final paper. Engage scientists in grades 4-6 and prepare them for standardized tests using *Just the Facts: Earth and Space Science*. "In an era of growing anti-intellectualism, [Judt's] essays remind us of what we gain when we stick fast to high ethical and intellectual standards, and what is lost when we let them slip." —Mark Mazower, *Financial Times* "Scintillating journalism . . . This collection is a reminder of Judt's clear mind and prose and, as Homans says in her lovely introduction, his fidelity to hard facts and to honest appraisal of the modern scene." —Samuel Moyn, *The New York Times Book Review* In an age in which the lack of independent public intellectuals has often been sorely lamented, the historian Tony Judt played a rare and valuable role, bringing together history and current events, Europe and America, what was and what is with what should be. In *When the Facts Change*, Tony Judt's widow and fellow historian Jennifer Homans has assembled an essential collection of the most important and influential pieces written in the last fifteen years of Judt's life, the years in which he found his voice in the public sphere. Included are seminal essays on the full range of Judt's concerns, including Europe as an idea and in reality, before 1989 and thereafter; Israel, the Holocaust and the Jews; American hyperpower and the world after 9/11; and issues of social inclusion and social justice in an age of increasing inequality. Judt was at once most at home and in a state of what he called internal exile from his native England, from Europe, and from America, and he finally settled in New York—between them all. He was a historian of the twentieth century acutely aware of the dangers of ethnic exceptionalism, and if he was shaped by anything, it was the Jewish past and his own secularism. His essays on Israel ignited a firestorm debate for their forthright criticisms of Israeli government policies relating to the Palestinians and the occupied territories. Those crucial pieces are published here in book form for the first time, including an essay, never previously published, called "What Is to Be Done?" These pieces are suffused with a deep compassion for the Israeli dilemma, a compassion that instilled in Judt a sense of responsibility to speak out and try to find a better path, away from what he saw as a road to ruin. *When the Facts Change* also contains Judt's homages to the culture heroes

who were some of his greatest inspirations: Amos Elon, François Furet, Leszek Kolakowski, and perhaps above all Albert Camus, who never accepted the complacent view that the problem of evil couldn't lie within us as well as outside us. Included here too is a magnificent two-part essay on the social and political importance of railway travel to our modern conception of a good society; as well as the urgent text of "What Is Living and What Is Dead in Social Democracy," the final public speech of his life, delivered from a wheelchair after he had been stricken with a terrible illness; and a tender and wise dialogue with his then-teenage son, Daniel, about the different outlooks and burdens of their two generations. To read *When the Facts Change* is to miss Tony Judt's voice terribly, but to cherish it for what it was, and still is: a wise, human, deeply informed view on our most pressing concerns, delivered in good faith. If American journalism were a religion, as it has been called, then its supreme deity would be "objectivity." The high priests of the profession worship the concept, while the iconoclasts of advocacy journalism, new journalism, and cyberjournalism consider objectivity a golden calf. Meanwhile, a groundswell of tabloids and talk shows and the increasing infringement of market concerns make a renewed discussion of the validity, possibility, and aim of objectivity a crucial pursuit. David T. Z. Mindich reaches back to the nineteenth century to recover the lost history and meaning of this central tenet of American journalism. His book draws on high profile cases, showing the degree to which journalism and its evolving commitment to objectivity altered and in some cases limited the public's understanding of events and issues.
