Curves and Surfaces Sep 18 2019 This volume constitutes the thoroughly refereed post-conference proceedings of the 8th International Conference on Curves and Surfaces, held in Paris, France, in June 2014. The conference had the overall theme: "Representation and

Approximation of Curves and Surfaces and Applications". The 32 revised full papers presented were carefully reviewed and selected from 39 submissions. The scope of the conference was on following topics: approximation theory, computer-aided geometric design, computer graphics and visualization, computational geometry and topology, geometry processing, image and signal processing, interpolation and smoothing, mesh generation, finite elements and splines, scattered data processing and learning theory, sparse and high-dimensional approximation, subdivision, wavelets and multi-resolution method.

Ships and Offshore Structures XIX Apr 18 2022 This three-volume work presents the proceedings from the 19th International Ship and Offshore Structures Congress held in Cascais, Portugal on 7th to 10th September 2015. The International Ship and Offshore Structures Congress (ISSC) is a forum for the exchange of information by experts undertaking and applying marine structural research. The aim of

Empowering Users through Design May 07 2021 At the crossroads of various disciplines, this collective work examines the possibility of a new end-user "engagement" in ongoing digital/technological products and services development. It provides an overview of recent research specifically focused on the user's democratic participation and empowerment. It also enables readers to better identify the main opportunities of participatory design, a concept which encourages the blurring of the role between user and designer. This allows people to escape their status as "end-user" and to elevate themselves to the level of creator. This book explores new avenues for rethinking the processes and practices of corporate innovation in order to cope with current socio-economic and technological changes. In so doing, it aims to help companies renew industrial models that allow them to design and produce new ranges of technological products and services by giving the user an active role in the development process, far beyond the basic role of consumer. Intended for designers, design researchers and scientists interested in innovation and technology management, this book also provides a valuable resource for professionals involved in technology-based innovation processes.

Making Hong Kong Nov 01 2020 This insightful book provides a comprehensive survey of urban development in Hong Kong since 1841. Pui-yin Ho explores the ways in which the social, economic and political environments of different eras have influenced the city's development. From colonial governance, wartime experiences, high density development and the return to Chinese sovereignty in 1997 through to contemporary challenges, this book explores forward-looking ideas that urban planning can offer to lead the city in the future. Evaluating the relationship between town planning and social change, this book looks at how a local Hong Kong identity emerged in the face of conflict and compromise between Chinese and European cultures. In doing so, it brings a fresh perspective to urban research, providing historical context and direction for the future development of the city. Hong Kong's urban development experience offers not only a model for other Chinese cities but also a better understanding of Asian cities more broadly. Urban studies scholars will find this an exemplary case study of a developing urban landscape. Town planners and architects will also benefit from reading this comprehensive book as it shows how Hong Kong can be taken to the next stage of urban development and modernisation.

Finance and Development, June 2014 Feb 16 2022 This chapter highlights various ways Asia's growth has affected the world economy. The chapter also shows that if currency trends continue, the Asian economy is expected to be larger than that of the United States and Europe combined. Some Asian countries offer sophisticated financial markets and are centers for technological innovation, while others are largely agricultural. The study shows that the region is home to 700 million poor people, about 65 percent of the world's poor—a figure that stands in stark relief against Asia's economic strength and growing prosperity. The chapter also references the inquiry by the managing editor of the Journal of Economic Perspectives into the rich and sometimes tortured relationship between economics and virtue.

Regulating Health Foods Mar 25 2020 With ageing populations, rising incomes and a growing recognition of the link between diet and health, consumers are interested in new food products, supplements and ingredients with purported health benefits. The food industry has responded with new f

Liquidity Lost Apr 25 2020 The interventions of crisis management

during the 2007 to 2011 financial crisis were not simply responses to a set of given developments in markets, banking or neo-liberal capitalism. Nor can those interventions be adequately explained as the actions of sovereign state officials and institutions. Instead, Langley argues, processes of crisis governance are shown to have established six principal technical problems to be acted upon: liquidity, toxicity, solvency, risk, regulation, and debt and that the governance of these technical problems, is shown to have been strategically assembled in order to secure the continuation of a particular, financialized way of life that depends upon global financial circulations. Contributing to interdisciplinary debates in cultural economy and the social studies of finance, and grounded in extensive empirical research, this book offers an innovative analysis of how the contemporary global financial crisis was governed. Through an exploration of the interventions made by central banks, treasuries, and regulatory authorities in the Anglo-American heartland of the crisis between 2007 and 2011, experimental and strategic apparatuses of crisis governance are shown to have emerged. These discrete apparatuses established the six technical problems to be acted upon, but also shared certain proclivities and preferences. Crisis governance assembled discourses and devices of economy in relation with sovereign monetary, fiscal, and regulatory techniques, and elicited an affective atmosphere of confidence. It also sought to secure the financialized way of life which turns on the opportunities ostensibly afforded by uncertain financial circulations, and gave rise to post-crisis technical fixes designed to advance the resilience of banking and the macro-prudential regulation of financial stability. Thus, the consensus that prevails across economics, political economy, and beyond - wherein sovereign state institutions are cast as coming to the rescue of the markets, banking, or neo-liberal capitalism - conceals a great deal more than it reveals about the governance of the global financial crisis.

CDS & CDS OTA 15 Years General Knowledge Topic wise Solved Papers (2007 - 2021) 2nd Edition May 27 2020

The Other '68ers Feb 04 2021 This is a history of 1968 written from a new perspective-that of center-right student activists in West Germany. Based on oral history interviews and new archival sources, it examines the ideas, experiences, and repertoires of center-right students in this age of protest. Writing these activists back into the history of 1968 and its

afterlives -including student protest, cultural revolt, internationalism, debates about left-wing violence and the terror of the Red Army Faction, the memory wars of the 1980s and beyond - reveals that this was a broader, more versatile, and, ultimately, more consequential phenomenon than the traditionally narrower focus on a left-wing minority allows. *Other '68ers* demonstrates that we need a more nuanced history of the 1968 generation and of generational conflict during these years. Student activists comprised individuals from across the political spectrum, who often had very different ideas about what kind of a society they envisaged and how to address the shortcomings of West German democracy. 1968 was a moment of intense political conflict, but it also played out within the student body and nurtured contrasting identities. This book shows that the center-right involvement in 1968 had real consequences. Many of the protagonists of this book would go on to pursue high-profile political careers and leave their mark on West German political culture. *Other '68ers* therefore sheds fresh light on how West Germany's center-right dealt with the crisis of hegemony and political identity it experienced in the wake of 1968, how it coped with generational change, how it transformed and modernized after losing power at the national level for the first time in 1969, and how it managed to re-emerge so successfully in the 1980s.

ACCA, for Exams Up to June 2014 Jun 27 2020 BPP Learning Media is the sole Platinum Approved provider of ACCA content. Our examiner-reviewed Study Texts and Practice & Revision Kits, and our interactive study tools will provide you with the up-to-date material you need for exam success.

Social Entrepreneurship in the Greater China Region Jan 03 2021 This book offers the first exploration into the development of social enterprises in the Greater China region, consisting of Hong Kong, Macau, Taiwan and Mainland China. By drawing on the research and experience of over a dozen scholars and practitioners from across the area, it offers a picture of how a strong State can play an important role as a catalyst in developing the social entrepreneurship sector, particularly by legitimizing it. It delves into the role and impact of institutions and policy on the development of social enterprises, and explains how micro and macro factors might interact in influencing social entrepreneurship. Structured in two parts – policy and cases – it reveals the historical development of the

Social enterprises sector in the Chinese context and then illustrates this using cases studies. Providing an alternative view of social entrepreneurship by highlighting the importance of context in this new sector, the book questions whether or not social entrepreneurship is preferable to more conventional models of development. Sparking new interest and offering fresh insight into social entrepreneurship in the Greater China region, this book will be useful to students and scholars of Chinese Studies, Business Studies and Sociology.

Harlequin Blaze June 2014 Bundle Mar 17 2022 Harlequin Blaze brings you four new red-hot reads for one great price, available now! This Harlequin Blaze bundle includes *Riding High* by NEW YORK TIMES bestselling author Vicki Lewis Thompson, *Testing the Limits* by Kira Sinclair, *Need You Now* by Debbi Rawlins and *Final Score* by USA TODAY bestselling author Nancy Warren. Look for four new sexy, steamy stories every month from Harlequin Blaze!

Expertisation and Democracy in Europe Sep 23 2022 Expertisation and Democracy in Europe provides a much-needed account of the role and re-organisation of expertise and expert knowledge in Europe and the European Union in a broad range of policy spheres, contributing to the debate triggered by the recent crises. It brings novel perspectives to debates on technocracy and our understanding of the relations between knowledge, experts and democracy. The book explores and assesses new and old linkages between knowledge, expertise and democracy, and expands and deepens the current debates by addressing questions such as: What is the role of expertise in Europe? How is knowledge of different kinds embedded in and decisive for democratic practice in contemporary democracies? How are we to assess recent transformations of the expert-citizens and government-civil society relationships from the perspective of democracy, and which paths are viable in the years to come? Finally, the book engages with and gives flesh to the notion of expertisation not only as a broad political and societal diagnosis, but also as a multidimensional and deeply contested process that unfolds in concrete practices and institutional settings. This text will be of key interest to scholars and students of European studies, European and European Union politics, democracy, public policy, international relations, sociology, gender studies and media studies.

Harlequin Desire June 2014 - Bundle 1 of 2 Sep 11 2021 Harlequin

New Perspectives on Corporate Social Responsibility Aug 10 2021
Providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations, this book addresses “the missing link” between theoretical CSR concepts and everyday management practice. It acts as a guide to awaken managers to the advantages of adopting a CSR “mindset” when developing sustainable business strategies. The book consists of three parts: 1) A theoretical realm which establishes the key concepts and rationale for the adoption of a sustainable CSR approach, 2) A practical realm which addresses putting CSR and sustainability into business practice, 3) An educational realm which proposes how to incorporate the concepts into teaching and training.

Harlequin Romantic Suspense June 2014 Bundle Dec 14 2021

Consumer Involvement in Private EU Competition Law Enforcement Dec 22 2019 This text is a timely and comprehensive examination of consumer participation in EU competition law enforcement. Using in-depth analysis of recent case law and policy documents, it offers a clear and innovative framework of the subject's normative and practical aspects, and proposes necessary remedial and procedural rules to enable participation.

Report of the Conference on Disarmament Jun 08 2021 The Conference on Disarmament submits to the sixty-eighth session of the United Nations General Assembly its annual report on its 2014 session, together with the pertinent documents and records.

Republic of Armenia Dec 02 2020 This paper discusses Armenia's Request for Arrangement Under the Extended Fund Facility (EFF). Performance under the 2010–2013 program, which was supported by arrangements under the EFF and Extended Credit Facility (ECF), was sound, with growth restored, large fiscal and external imbalances reduced, and buffers rebuilt. However, challenges remain, particularly in

further reducing vulnerabilities and strengthening medium-term growth dynamics. Fiscal policy will support the growth recovery in 2014 by providing a modest stimulus, before moving to a gradual consolidation stance in 2015–2017. The IMF Staff supports the authorities' request for an IMF-supported program.

Innovation Trends in Plastics Decoration and Surface Treatment Jun 20 2022 The plastics industry is a major player for consumer items, notably for the automotive, consumer electronics and packaging industries, and is necessarily very active in innovation. As a result, moulded thermoplastics are achieving new heights in decorative appearance and quality. Many striking aesthetic effects are possible by employing new polymer blends coupled with a diverse range of decoration and surface treatment technologies. These can produce three-dimensional and tactile finishes, high definition images, flawless high gloss and metallic surfaces, as well as effects ranging from imitation materials, interferential colours, colour gradients, colour change and travel, gloss and matte combinations, and even acoustic or olfactory effects. Manufacturing processes to achieve these include several types of in-mould film, coating or decorating technique, relatively recent technologies to improve surface quality, as well as traditional separate decorating or coating processes such as dry offset; flexographic; inkjet; pad and screen printing; foil transfer; labelling; laser marking; plating; spray coating; and vacuum deposition. This unique book analyses and compares recent trends in each of over 20 types of mainstream manufacturing process and 10 classes of sensory effect they can produce. Supported by over 100 tables, a 3-year sampling of over 1,000 mentioned patent documents and hundreds of commercial developments helps to identify the main trends and their innovators, key innovative clusters and the most sought-after effects, as well as provide indications for the future.

The Role of Consent in Human Trafficking Jul 21 2022 Human trafficking

is consistently featured on the global political agenda. This book examines the trafficking of adult female victims for sexual exploitation, and specifically the understanding of consent and its influence in the identification and treatment of trafficking victims. Jessica Elliott argues that when applied to situations of human trafficking, migration and sexual exploitation, the notion of consent presents problems which current international laws are unable to address. Establishing the presence of 'coercion' and a lack of consent can be highly problematic, particularly in situations of human trafficking and exploitative prostitution; activities which may be deemed inherently coercive and problematically clandestine. By examining legal definitions of human trafficking in international instruments and their domestic implementation in different countries, the book explores victimhood in the context of exploitative migration, and argues that no clear line can be drawn between those who have been smuggled, trafficked, or 'consensually trafficked' into a situation of exploitation. The book will be great use and interest to students and researchers of migration law, transnational criminal law, and gender studies.

Harlequin American Romance June 2014 Bundle Oct 24 2022 Harlequin American Romance brings you four new all-American romances for one great price, available now! This Harlequin American Romance bundle includes *Her Cowboy Hero* by NEW YORK TIMES bestselling author Tanya Michaels, *The Texan's Baby* by NEW YORK TIMES bestselling author Donna Alward, *The SEAL's Baby* by Laura Marie Altom and *A Rancher's Honor* by Ann Roth. International Financial Statistics, June 2014 Nov 13 2021 The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly.

Reshaping Markets Feb 22 2020 Set against the origins and consequences of the global financial crisis, this timely book offers an

enriching and revealing narrative of the role that the state plays in regulating markets. Focusing on core areas of private law such as corporate, labour and banking law, the contributors offer a conceptual framework in which to examine the central tenets of the role of private law in today's global economy. In the current climate of ever increasing economic inequality and austerity measures, the authors highlight the urgent need for a comprehensive analysis of the continuing tension between ideas of market liberalism and theories of society. With a focus on both the domestic and transnational dimensions of market governance, the authors offer a crucial insight into the co-existence and interaction between state and market-based economic governance.

Climate Justice in a Non-ideal World Sep 30 2020 Climate change is a pressing international political issue, for which a practical but principled solution is urgently required. *Climate Justice in a Non-Ideal World* aims to make normative theorising on climate justice more relevant and applicable to political realities and public policy. The motivation behind this edited collection is that normative theorising has something to offer even in an imperfect world mired by partial compliance and unfavourable circumstances. In the last years, a lively debate has sprung up in political philosophy about non-ideal theory and there has also been an upsurge of interest in the various normative issues raised by climate change such as intergenerational justice, transnational harm, collective action, or risk assessment. However, there has been little systematic discussion of the links between climate justice and non-ideal theory even though the former would seem like a paradigm example of the relevance of the latter. The aim of this edited volume is to address this. In doing so, the volume presents original work from leading experts on climate ethics, including several who have participated in climate policy. The first part of the book discusses those facets of the debate on climate justice that become relevant due to the shortcomings of current global action on climate change. The second part makes specific suggestions for adjusting current policies and negotiating procedures in ways that are feasible in the relatively short term while still decreasing the distance between current climate policy and the ideal. The chapters in the third and final part reflect upon how philosophical work can be brought to bear on the debates in climate science, communication, and politics.
