A proven approach preferred by LPN/LVN educators and students for more than 50 years, Rosdahl's Textbook of Basic Nursing, 12th Edition, has been thoroughly revised and updated to equip today's LPN/LVN students with the foundational knowledge and skills to confidently pass the NCLEX-PN® and deliver safe, effective care. This engaging, easy to read, highly visual text reflects up-to-date clinical practices and provides the perfect learning package to ensure understanding and help students confidently transition to clinical practice. The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. Health Professions Education: A Bridge to Quality is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system. All of the field's must-have information is delivered in an easy-to-grasp, visually clear and precise design. The perfect companion to Introductory Medical-Surgical Nursing, 10th Edition, this handy workbook helps students review and apply essential content from the textbook. With this resource, students will prepare for the challenges of today's exams and tomorrow's practice—from the hospital or clinic to the home or long-term care facility! This gold standard Canadian text prepares and inspires nursing students to become engaged with and respond to the latest and most vital professional, legal, ethical, political, social, economic, and environmental issues affecting Canadian nurses. The chapters, by the most influential scholars throughout Canada, explore a broad range of current issues including but not limited to the Canadian health care system, the nursing shortage, professional organizations, nursing research, nursing education, workplace realities, and societal challenges such as nursing in First Nations communities. As a unique emphasis, the authors fundamentally believe students who understand nursing issues are in the best position to make significant contributions to their resolution. In that vein, the authors critically analyze the tensions and contradictions that exist between nurses' legislated authority to self-regulate and the changing nature and realities of nurses' work while inspiring more nurses to influence decision making in professional associations, collective bargaining units, government, and workplace.
