World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring. Bringing together Custer, Sherman, Grant, and other fascinating military and political figures, as well as great native leaders such as Crazy Horse, Sitting Bull, and Geronimo, this "sweeping work of narrative history" (San Francisco Chronicle) is the fullest account to date of how the West was won—and lost. After the Civil War the Indian Wars would last more than three decades, permanently altering the physical and political landscape of America. Peter Cozzens gives us both sides in comprehensive and singularly intimate detail. He illuminates the intertribal strife over whether to fight or make peace; explores the dreary, squalid lives of frontier soldiers and the imperatives of the Indian warrior culture; and describes the ethical quandaries faced by generals who often sympathized with their native enemies. In dramatically relating bloody and tragic events as varied as Wounded Knee, the Nez Perce War, the Sierra Madre campaign, and the Battle of the Little Bighorn, we encounter a pageant of fascinating characters, including Custer, Sherman, Grant, and a host of officers, soldiers, and Indian agents, as well as great native leaders such as Crazy Horse, Sitting Bull, Geronimo, and Red Cloud and the warriors they led. The Earth Is Weeping is a sweeping, definitive history of the battles and negotiations that destroyed the Indian way of life even as they paved the way for the emergence of the United States we know today. And we're being shut down." Jamie's boss then tells everyone to drink some champagne, and in a few seconds they'll fall asleep---for good. If they refuse, they'll be shot in the head. Escape is not an option. Jamie's boss has shut down the elevators and rigged the fire towers with chemical bombs. Panic sets in, chaos erupts, and no one is sure whom to trust.
