International and Comparative Studies in Information and Library Science Dec 29 2019 Comparative studies in information and library science published in the past ten years have reflected a broad spectrum of backgrounds, interests, and issues, but until now services between different countries, Asian nations in particular, have never been gathered or organized into a single source. As demand from researchers, students, directors, and practitioners for pertinent literature continues to grow, there is a definite and

increasing need for a focused guide to international and comparative librarianship. *International and Comparative Studies in Information and Library Science: A Focus on the United States and Asian Countries* consists of eighteen previously published articles divided into seven categories that address issues such as research methodologies; information policy; professional education; information organization; and school, academic, and public libraries. It also features a comprehensive bibliography of related articles, books, proceedings, and other publications in both English and Chinese and four appendixes that list curricula, journal titles, conferences, and websites relating to International and comparative librarianship available at the time of publication. With this important compilation, Yan Quan Liu and Xiaojun Cheng fill an important and previously unmet need. Book jacket.

Passive Vibration Control of Structures Mar 12 2021 *Research in vibration response control deals not only with prevention of catastrophic failures of structures during natural or accidental/manmade hazards but also ensures the comfort of occupants through serviceability. Therefore, the focus of this book is on the theory of dynamic response control of structures by using different kinds of passive vibration control devices. The strategies used for controlling displacement, velocity, and acceleration response of structures such as buildings, bridges, and liquid storage tanks under the action of dynamic loads emanating from earthquake, wind, wave, and so forth are detailed. The book:*
Explains fundamentals of vibration response control devices and their practical applications in response mitigation of structures exposed to earthquake, wind, and wave loading Offers a comprehensive overview of each passive damper, its functioning, and mathematical modeling in a dynamical system Covers practical aspects of employing the passive control devices to some of the benchmark problems that are developed from existing buildings and

bridges in different countries worldwide Includes MATLAB® codes for determining the dynamic response of single degree of freedom (SDOF) and multi-degree of freedom (MDOF) systems along with computational models of the passive control devices This book is aimed at senior undergraduate students, graduate students, and researchers in civil, earthquake, aerospace, automotive, mechanical engineering, engineering dynamics, and vibration control, including structural engineers, architects, designers, manufacturers, and other professionals.

Poverty and Income Distribution May 26 2022 While there has been a perceptible increase in per capita income and expenditure and possibly some decline in the incidence of poverty in India, what till remains is massive and will not be remedied quickly. Even with

radical policies, to effect a large change in the shifts in income and occupational structures will take more than the rest of this century. In the welter of recent exchanges between the government and the opposition as well as between planners and market advocates on the strategy of growth, these issues have been largely obfuscated. This selection of articles from Economic and Political Weekly on different aspects of poverty, unemployment and income distribution will stimulate fresh discussion of the many methodological and policy questions that remain unresolved.
