Imagine an eighteen-year-old American girl who has never read a newspaper, watched television, or made a phone call. An eighteen-year-old-girl who has never danced—and this in the 1960s. It is in Cambridge, Massachusetts where Leonard Feeney, a controversial (soon to be excommunicated) Catholic priest, has founded a religious community called the Slaves of the Immaculate Heart of Mary. The Center's members—many of them educated at Harvard and Radcliffe—surrender all earthly possessions and aspects of their life, including their children, to him. Patricia Chadwick was one of those children, and Little Sister is her account of growing up in the Feeney sect. Separated from her

parents and forbidden to speak to them, Patricia bristles against the community's draconian rules, yearning for another life. When, at seventeen, she is banished from the Center, her home, she faces the world alone, without skills, family, or money but empowered with faith and a fierce determination to succeed on her own, which she does, rising eventually to the upper echelons of the world of finance and investing. A tale of resilience and grace, *Little Sister* chronicles, in riveting prose, a surreal childhood and does so without rancor or self-pity.

The I-Gel supraglottic airway is a disposable, latex-free device for airway management during anaesthesia. The design of this device is significantly different from the previously used devices, notably laryngeal mask airways. Its bowl is made of a soft, non-inflatable thermoplastic elastomer, anatomically preformed to mirror the perilaryngeal structure. The I-Gel contains an additional epiglottis rest, which helps to prevent the epiglottis from down-folding or obstructing the laryngeal inlet. The device also includes a gastric channel, allowing drainage of air and gastric contents or passage of a gastric tube. This book provides a brief history of airway management and the classification of supraglottic airway devices; the mechanisms and forces contributing to their seal, and highlights the main differences between the devices. Also discussed is the process of I-Gel development including an initial mannequin and cadaver studies, with a description of the I-Gel's use in clinical practice, indications and description of its use in the operating room, and use of the I-Gel in different surgical subspecialties including laparoscopic procedures. This book offers a comparative analysis of how post-crisis restructuring has affected the evolution and prospects of small, locally-oriented banks. The discussion focuses specifically on "small" European countries; that is, countries with diversified banking systems, with a strong presence of cooperative and other forms of local banks. Such countries include highly developed economies like Italy and emerging European economies, such as Poland. The authors stress the unique importance of local banks in generating credit for both households and firms, and hence in contributing to overall economic growth. Chapters cohere around the argument that although smaller banks fared better than their larger counterparts the recent financial crisis, they have been directly and indirectly discriminated against in post-crisis restructuring schemes, and, as such, face many operational and strategic challenges today. The contributors are a distinguished group of researchers with expert knowledge of the competitive positions of and

opportunities for locally oriented banks, who combine theoretical and empirical perspectives on these topics. When the chance to run arrives, Beldon doesn't think twice about escaping into the shadows of an enchanted castle locked in an eternal winter. He just wants to bury a secret. But the castle is a cold, cruel place and his host is less than welcoming. The sparks that fly between them are icy and aggressive; the tension building until one night it almost costs Beldon his life. Then things change. Beldon's attention turns to the shadowy Beast and the mystery that surrounds him. There is a curse to be broken after all and Beldon promised to help find a mysterious figure known as Beauty. However, Beldon did not expect his secret to resurface within this frozen castle and as such he is forced to confront himself and answer one question. As he and The Beast grow closer, does he want this Beauty found?~~~~ The original draft for the community who wanted a physical copy~ Chivalry--"with its pageants, heraldry, and knights in shining armor--"was a social ideal that had a profound influence on the history of early modern Europe. The International Commission on the Holocaust in Romania was established in October 2003 on the initiative of Ion Iliescu, the President of Romania; this

final report was presented to him in November 2004. The aim of the Commission was to research the facts and determine the truth about the Holocaust in Romania during World War II. The report examines various aspects of the state-organized participation of Romania in the mass murder of Jews in Romania and in Romanian-controlled territories, as well as in northern Transylvania where the genocide was perpetrated by the Nazis and their Hungarian allies. Inter alia, it discusses antisemitism and the evolution of Romanian anti-Jewish policies from the late 1930s to 1944, the impact of the Soviet annexation of Bessarabia and Northern Bukovina on antisemitism in Romania, anti-Jewish incidents in 1940 and the pogroms in Bucharest and Iași, mass murders of Jews in the recaptured provinces and deportation to Transnistria in 1941, mass murder of Jews in Odessa and in Transnistrian camps, the "Romanianization" of the economy and the expropriation of Romanian Jews, the reaction of the Jewish community in Romania to anti-Jewish policies, and the personal responsibility of Ion Antonescu for the genocide. Relates, also, to war crimes trials held in Romania, and to the trivialization of the Holocaust and its "selective" and outright denial in postwar Romania. Provides advice to designers, manufacturers, installers, users and others. Contents: Compressor plant; Air receivers; Coolers; Air dryers; Installation of compressors; Main line systems; Portable pneumatic equipment; Pneumatic powered machinery; Actuators; Interlocking methods of circuit design; Inspection and maintenance; Training. Much has been written about the economic and political problems of countries that are in the process of changing from centrally planned systems to market systems. Most studies have focused on the economic, legal, political and sociological problems these economies have had to face during the transition period. However, not much has been written about the dramatic changes that have to

be made to the accounting and financial system of a transition economy. This book was written to help fill that gap. This book is the second in a series to examine accounting and financial system reform in transition economies. The first book used Russia as a case study. The present volume in the series examines some additional aspects of the reform in Russia and also looks at the accounting and financial system reform efforts that are being made in Ukraine, Bosnia & Herzegovina, Armenia and five Central Asian republics. Current information about arrhythmogenic mechanisms as they apply to clinical rhythm disorders is presented from both the basic science and clinical perspectives. This book contains the best contributions presented during the 6th National Conference on Earthquake Engineering and the 2nd National Conference on Earthquake Engineering and Seismology - 6CNIS & 2CNISS, that took place on June 14-17, 2017 in Bucharest - Romania, at the Romanian Academy and Technical University of Civil Engineering of Bucharest. The book offers an updated overview of seismic hazard and risk assessment activities, with an emphasis on recent developments in Romania, a very challenging case study because of its peculiar intermediate-depth seismicity and evolutive code-compliant building stock. Moreover, the book collects input of renowned scientists and professionals from Germany, Greece, Italy, Japan, Netherlands, Portugal, Romania, Spain, Turkey and United Kingdom. The content of the book focuses on seismicity of Romania, geotechnical earthquake engineering, structural analysis and seismic design regulations, innovative solutions for seismic protection of building structures, seismic risk evaluation, resilience-based assessment of structures and management of emergency situations. The sub-chapters consist of the best papers of 6CNIS & 2CNISS selected by the International Advisory and Scientific Committees. The book is targeted at researchers and experts in seismic hazard and risk, evaluation and rehabilitation of buildings and structures, insurers and re-insurers, and decision makers in the field of emergency situations and recovery activities. The contributors analyse how the crisis years have had a long lasting impact on the structure of European banking and explore the regulatory architecture that has started to take form in their wake. Academic

experts and senior policy makers have contributed to this volume, which is organized in five main parts. The first part presents an overview of European banking through the crisis and beyond. The second part analyses performance and innovation in EU banking markets. The third part discusses the key regulatory changes aimed at fostering financial stability. Part four looks at the relevance of cross-border banking and part five presents a detailed analysis of the main EU banking markets.
