A Wrinkle in Time Dec 09 2020 Madeleine L'Engle's ground-breaking science fiction and fantasy classic, now a major motion picture. It was a dark and stormy night; Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. *A Wrinkle in Time*, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem. *A Wrinkle in Time* is the winner of the 1963 Newbery Medal. Writers are Readers Jan 02 2023 In *Writers Are Readers*, the mutually supportive roles of reading and writing are made visible through the idea of "flipsides;" how a reader's insights can be turned around to provide insights into his own writing, and vice versa. Lester and Reba's trademark engaging style is woven throughout chapters full of sample lessons, student writing samples, and recommended texts for maximizing the flipped concept across the year. "Leading the student to understand what he did as a reader can become a lens that brings into focus what the writer had to do before a reader ever saw the page," they write.
