Founders of the phenomenally successful publishing company Lonely Planet, Tony and Maureen Wheeler have produced travel guides to just about every country across the globe. Lonely Planet Publications was born in 1973 when the Wheelers self-published a quirky travel guide, Across Asia on the Cheap. This was quickly followed by what soon became the backpackers' bible, South-East Asia on a Shoestring . Going boldly where no other travel publisher had ventured, their budget-conscious travellers guide provided knowledge long before the advent of mass tourism. Once While Travelling: The Lonely Planet Story is a unique mix of autobiography, corporate history and travel book. It traces Tony and Maureen Wheeler's personal story as well as the often bumpy evolution of their business into the world's largest independent travel publishing company. Above all, their memoir reveals the spirit of adventure that has made them, according to the New York Daily News, 'the specialists in guiding weird folks to weird places.' The study reported in this volume grew out of some theoretical work, one phase of which bore specifically on the behavior of individuals in social movements that made specific (and unfulfilled) prophecies. We had been forced to depend chiefly on historical records to judge the adequacy of our theoretical ideas until we by chance discovered the social movement that we report in this book. At the time we learned of it, the movement was in mid-career but the prophecy about which it was centered had not yet been disconfirmed. We were understandably eager to undertake a study that could test our theoretical ideas under natural conditions. That we were able to do this study was in great measure due to the support obtained through the Laboratory for Research in Social Relations of the University of Minnesota. This study is a project of the Laboratory and was carried out while we were all members of its staff. We should also like to acknowledge the help we received through a grant-in-aid from the Ford Foundation to one of the authors, a grant that made preliminary exploration of the field situation possible.
